

**HOTLINE NUMBER**  
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this product (precautions, directions, first aid, statements of labeling, or pesticide incidents), you may also call 1-800-832-HELP (4357), 24 hrs/day, 7 days/week.

**ENVIRONMENTAL HAZARDS**  
This pesticide is toxic to aquatic invertebrates. **DO NOT** apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. **DO NOT** apply when weather conditions favor drift from treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in water adjacent to treated areas.  
This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. **DO NOT** apply this product or allow it to drift to blooming crops or weeds if bees are foraging in the treatment area.

**PHYSICAL OR CHEMICAL HAZARDS**  
**Contents under pressure. DO NOT** use, or store near heat or open flame. **DO NOT** puncture or incinerate container. Exposure to temperatures above 100°F may cause bursting.

**SMART SOLUTIONS FACTS**  
A ready-to-use solution to kill flies in a broad range of urban environments. Provides attractancy properties which will aid in bringing flies into the treated bait area. Key attributes of this bait are:  
**PTT™ Active® Presprized Fly Bait**  
• Quick Knockdown  
• Kills flies for up to 30 days  
• Kills flies for up to 30 days on nonporous surfaces.  
• May be used in conjunction with a fly light program such as Vector Plasma™, Vector Plasma One™ and Vector™ Classic™ for monitoring of results and fly population reduction.  
• For best management practices, use the bait as part of an overall Integrated Pest Management (IPM) program utilizing residuals and contact sprays, traps and drain cleaners. For questions or comments, call 1-800-777-8570.

**DIRECTIONS FOR USE**  
**IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.**  
**Read Entire Label.** Use strictly in accordance with Precautionary Statements and Directions for Use, and with applicable state and federal regulations. Apply bait only in areas that are out of reach of children and pets.

**USE RESTRICTIONS**  
• **DO NOT** apply to surfaces which may reach excessive temperatures. Examples include porches of stoves, lighting above food preparation areas, ovens, grills, fume hoods, steam tables, toasters, fryers, dishwashers and hot water pipes.  
• **DO NOT** apply directly on food preparation surfaces or dining surfaces, where foods for consumption may come in contact.  
• **DO NOT** apply bait in areas where animals can ingest product.  
• **DO NOT** apply directly upon animals.  
• **DO NOT** apply to mixing equipment in dairy areas.  
• **DO NOT** apply directly into any electronic equipment or areas where electrical short circuit may occur.  
• **DO NOT** use in aircraft cabins; use in cargo areas only.

**APPLICATION INSTRUCTIONS**  
**AREA TREATMENT:** Point can toward target area from a distance no further than 12 ft. (30 cm) and press down actuator. Make a light application at a rate of 2 in/fsec and avoid run off. Do not spray directly on food. Do not spray directly on children, pets, birds, or animals. Do not spray on lead, which may include garbage receptacles and lids, refuse containers, under tables and benches, recycling bins, dumpsters, behind vending machines, under bars, call/hutch ceilings, eave areas, walls and/or areas where flies are likely to congregate or infest. **DO NOT** apply bait in areas that are frequently cleaned. This product will not adhere to surfaces that are dusty or greasy. Reapply when bait placements are no longer visible and/or reinfestation occurs. Use a minimum of 100 ft. between applications. Bait placements should be made from 6 in to 15 cm to create a band application at a rate of 2 in/fsec. Band applications may be made to areas such as beam edges, receptacle edges, table or bench edges, around windows and window frames, under narrow eaves and other areas where there is a narrow area where flies land, roost and/or are likely to infest. Reapply when bait placements are no longer visible and/or reinfestation occurs. Use water-dampened paper towel to remove unwanted bait placements from the treated area.

**BAND TREATMENT:** Spray from a distance no further than 10 ft. from targeted areas from 6 in to 15 cm to create a band application at a rate of 2 in/fsec. Band applications may be made to areas such as beam edges, receptacle edges, table or bench edges, around windows and window frames, under narrow eaves and other areas where there is a narrow area where flies land, roost and/or are likely to infest. Reapply when bait placements are no longer visible and/or reinfestation occurs. Use water-dampened paper towel to remove unwanted bait placements from the treated area.  
**REMOVABLE BAIT PLACEMENTS:** Spray bait on a small object no larger than 24 in<sup>2</sup> and no smaller than 6 in, unless it is a rope or twine of at least 6 in long. Object may be made of wood, plastic, cardboard, index cards, nylon, metal or other suitable material. Place in areas of fly activity, and out of reach of children and domestic animals.

**FOOD HANDLING ESTABLISHMENTS:** Food/Feed handling establishments are places other than private residences in which food is held, processed, prepared or served, including but not limited to: restaurants, bars, hotels, schools, day care centers, and egg production operations. Do not apply under the Federal animal, poultry, shell egg grading and egg product inspection programs.

**Use within food preparation and food production areas of food handling establishments is limited to the interior of refuse receptacles, removable bait placement rooms or in stations. For areas outside of the food preparation and food production rooms, spot and/or band applications may be made to areas where flies congregate and rest.**

**Food/Feed Areas:** include areas for receiving, serving, storing (dry, cold, frozen, raw), packing, processing, preparing, packaging, holding, serving, and/or displaying of food, and areas for waste storage and enclosed processing systems (mills, chutes, edibles oils, syrups, etc.).  
All removable bait placements must be clearly marked with the wording "Fly Bait. Do not touch" (written, typed or stickered on it) and must be secured to the surface with an adhesive material or tape. Placements should be recorded and inspected with each service to that area. **DO NOT place removable bait placements over or on food preparation or food processing areas. The use of rope or twine is not allowed in food areas.**

**Non-Food/Feed Areas:** include areas such as garages, rooms, terraces, floor drains (to be used only for waste use), offices, boiler rooms, laundry, other rooms, garages, mop closets and storage areas (after packaging, canning or bottling).  
All removable bait placements must be clearly marked with the wording "Fly Bait. Do not touch". Place in areas conducive to fly activity, and out of reach of children and pets.  
Rope & Twine: Hang in areas where flies roost and/or congregate. Place a sticker or label clearly marked with the wording "Fly Bait. Do not touch" (written or typed) at the bottom of the rope or twine; place in areas out of reach of children, pets and livestock.

**PREVENTATIVE FLY PROGRAMS:** This product may be used as part of a preventative fly control program in conjunction with other fly control measures such as: traps, fly screens, garbage receptacles, underneath garbage lids, inside recycling bins or receptacles, and other labeled areas that will help prevent flies from being a nuisance.

**STORAGE AND DISPOSAL**  
**DO NOT** contain in the water, food or feed storage or disposal.  
**PESTICIDE STORAGE:** Store in a cool, dry area away from heat or open flame and inaccessible to children.  
**PESTICIDE DISPOSAL:** Wastes resulting from use of this product may be disposed of on site, in accordance with the label directions, or at an approved waste disposal facility.  
**CONTAINER HANDLING & DISPOSAL: DO NOT** puncture or incinerate. If empty, place in trash or offer for recycling, if available. If partly filled, call your local solid waste agency for disposal instructions.

Contains no CFCs or other ozone depleting substances.  
Federal regulations prohibit CFC propellants in aerosols.

**HOTLINE NUMBER**

Have the product container or label with you when calling a toll-free number for assistance. For more information or additional information on this product (including health concerns, medical emergencies or pesticide incidents), you may also call 1-800-852-HELP (4357, 24 hrs/day, 7 days/week)

**ENVIRONMENTAL HAZARDS**  
This pesticide is toxic to aquatic invertebrates. **DO NOT** apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. **DO NOT** apply directly to fish, shellfish, or aquatic animals. **DO NOT** apply runoff from treated areas may be hazardous to aquatic organisms in water adjacent to treated areas.  
This product is highly toxic to bees exposed to direct treatment or drift. **DO NOT** apply directly to bees or to areas where bees forage or show significant foraging activity adjacent to the treatment area.

**PHYSICAL OR CHEMICAL HAZARDS**  
**Contents under pressure. DO NOT** use or store near heat or open flame. **DO NOT** puncture or incinerate container. Exposure to temperatures above 100°F may cause venting.

**STORAGE AND DISPOSAL**  
**DO NOT** contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Store in a cool, dry area away from fire, heat, or moisture. Do not store in areas where the product may be disposed of on site. In accordance with the label directions, or at an approved waste disposal facility.  
**CONTAINER DISPOSAL:** Recycle where a recycling program is available. **If party filled:** Call your local solid waste agency for disposal instructions.
