83 mm

## WILCO SNAIL AND SLUG GEL

It is a colorless, odorless non-toxic gel that forms a barrier which protects plants from snails and slugs. Made from natural ingredients, it is completely harmless to children, birds, dogs, and other animals. When used as directed Unlike dry granular products, Wilco Snail and Slug Gel is **effective in wet weather as well as dry conditions and lasts for up to two weeks.**

**HOW TO USE:** Flip cap open and apply product through nozzle, forming a continuous barrier completely enclosing the area requiring protection. Close cap after use. If the nozzle becomes blocked, wash with warm water.

**Where to use:** Apply directly onto the soil or any hard surface especially around planters, pots, tubs and specific target plants. Wilco Snail and Slug Gel can also be used on vertical surfaces to protect entrances to external doorways, hanging baskets and other similar locations. Although Wilco Snail and Slug Gel will not damage plants, for best results do not apply directly to the foliage.

**When to use:** Whenever snails and slugs are active and when the barrier needs to be reapplied. Use at end of day, when weather is dry (snails and slugs are not in the garden if the weather is dry).

**Active ingredient:** Sodium chlorate - 5 % w/w;  
**Inert ingredient:** Sodium carboxymethyl cellulose, Potassium sorbate;  
**Water - 95% . Total.....100%**

**KEEP OUT OF REACH OF CHILDREN**

**Content: 1L (1.06 quart) (for 50 m/54.7 yards of barrier)**

**STORAGE AND DISPOSAL;**

Store in a cool, dry atmosphere away from extreme temperatures & direct sunlight in original labelled containers. Dispose of empty container in household waste.

Date of expiration and batch number: printed on the packaging.
